Top Features

Maytag® Commercial Technology

Maytag brand washers are known for their dependability. The new Bravos XL® washers continue that legacy with long-lasting, commercial-grade components such as corrosion-resistant springs, Direct Drive motor and a durable wash impeller.

A Best Buy rated top-load washer, according to a leading consumer magazine.

A Best Buy rated front-load washer, according to a leading consumer magazine.

Additional Features

Extra-Large Capacity to Clean Your Largest Loads²

At 4.5 cu. ft. of capacity, Bravos XL® HE washers are capable of washing even your largest loads. These washers have the ability to clean 21 towels in a single load.

PowerSpray Technology

Water and detergent are sprayed directly onto clothes early in the cycle for enhanced cleaning. This unique technology delivers enhanced cleaning performance by ensuring that detergent is evenly distributed throughout the load.

Optimal Dispensers

Maytag brand optimal dispensers provide enhanced cleaning performance. The dispensers work in unison with PowerSpray technology to inject detergent and other additives for better cleaning.

PowerWash® Cycle

The PowerWash® cycle uses a combination of extra cleaning action and a thorough rinse to help remove even your toughest stains.

Recirculation System

One of the many ways that Bravos XL® washers deliver superior cleaning is through recirculation. The washer uses a pumping system to redistribute detergent and water from the bottom of the washer to the top, contributing to the Best Cleaning in the Industry.

Stainless Steel Wash Basket

This washer features an all-new stainless steel wash basket that adds a polished, premium look and feel.

IntelliClean™ Impeller

Available in high efficiency top load washers, this feature is a wash plate with fins at the bottom of the wash basket. The wash plate continuously moves clothes through the water to clean more gently than a traditional agitator, and takes up less space to maximize capacity.

Meets CEE Tier 3³ Standards

This washer meets CEE Tier 3³ standards and is among the most efficient in the industry. It uses 74% less water and 82% less energy for a savings of up to \$2,200 in lifetime water and energy costs. Select markets qualify for CEE Tier 3³ Energy and Water Rating rebates. Consult your local utility company for available rebates.

SmoothClose™ Lid

Maytag brand's SmoothClose™ lid hinge design closes the washer lid slowly, helping with loading and unloading.

10-year Limited Parts Warranty¹ on Washer Motor and Stainless Steel Wash Basket

Bravos X™ washers are backed by a 10-year limited parts warranty¹ on the washer motor and stainless steel wash basket. With a 10-year limited parts warranty¹, you can look forward to years of worry-free, dependable cleaning. See Warranty certificate for more details.
